Snap in panel:

Our unique snap-type design totally eliminates the need for glues.

This add to a healthier working environment ensuring no formaldehyde and no toxic smells

The 'Snap in Panel' design allows easy replacement of interior panels...

Less than 30 minutes to change over the interior 'using the smart design of the snap in panels'.

The interior can be refreshed with choice of finishes to suit evolving office strategies...

LED Lighting:

Using FRESNEL optical lens for uniform lighting...designed to let light pass through 'multiple refractions and reflections' to achieve uniform lighting

The light emitting grate also has an air inlet to dissipate heat and assists in achieving a service life of up to 30000 hours

The CREE LED chip is super high performing, energy efficient LED for a crisp, low-glare output

- + color rendering index as high as Ra90
- + luminous efficiency as high as 84LM/W
- + excellent heat dissipation

Repositioning of Door:

Doors can be repositioned easily to accommodated future reconfiguration.

The doors on the light transmitting walls of the room can be freely repositioned

**Box Dimension (nominal):**

Box S:
1000W x 1010D x 2250H External
0870W x 0930D x 2080H Internal

Box M:
1660W x 1460D x 2250H External
1530W x 1380W x 2080H Internal

Box L:
2550W x 1840D x 2340H (2 modules) External
2370W x 2760D x 2170H (2 modules) Internal

Box L:
2500W x 2760D x 2340H (3 modules) External
2130W x 2680D x 2170H (3 modules) External

Box XL:
2770W x 1840D x 2340H (2 modules) External
2640W x 1760D x 2170H (2 modules) Internal

Box XL:
2770W x 2760D x 2340H (3 modules) External
2650W x 2680D x 2170H (3 modules) Internal

Modular:

Box L and Box XL design allows for growth modules to be added or remove to suit working requirements.

vystan
INTERIORS

T: (08) 89417774 | E: SALES@VYSTAN.COM

Assembly of parts are buckles, rivets and screws
(an alternative to glues - providing reduced VOC's for improved internal air quality)

Internal snap-in panels
(provides for simplified install and maintenance - screw-free connection)

Structure:

- + main structure module
- + surface panel module

+ main structure module includes:

a light transmitting door
two light transmitting walls + two solid walls
one solid ceiling + one solid floor
decorative parts for connecting the closing position
air purification
lighting and intelligent control equipment
materials are environment-friendly to international standards

+ the surface board is designed to accept customization of fabrics supplied by customers and also non-standard customization (surcharge applies for customization)

Four Filters for Healthy Air

The **first layer** is the primary filter:
Super-large capacity filter box – anti- blocking design.
Purpose is to prevent insects and other allergens from flying in and reduces the risk of block.
No replacement of filter required – just vacuum as required.

The **second layer** is the medium effect filter.
Blocks PM10 pollen allergens and filters PM10 up to 96.5%.
Pollen filter efficiency of 95.1%.
The function is to reduce the burden on the high-efficiency filter.
No replacement required. Remove for cleaning.

The **third layer** is the high effect filter:
Strong sterilization removing PM2.5.
The filtration efficiency of particles above PM2.5 on double-layer H13 filter paper is > 99.9%

The **fourth layer** is activated carbon layer:
This effectively absorbs and removes free harmful gases including:

- formaldehyde
- ammonia
- benzene
- other harmful substances

Exterior - steel plate

Construction:

Interiors finish: quick removal steel tile with polyester fabric/micro leather

Interiors insulation materials used:

Wave crest absorbent cotton

Polyester sound absorbent cotton

Acoustic damping felt

Acoustic seal strip

Magnesium oxide board

FSC board

Formaldehyde free (no tradition glues and chemicals)

Exterior finish: steel plate

Sound Absorption: indoor privacy sound to outdoor transmission achievement [35 to 40 decibels]

Insulation material used

Box is Relocatable:

Design allows for the relocation of the booth

Booth construction allows for quick and repeated dis-assembling and re-assembling.

Adjustment of landing feet:

Clockwise for landing of feet (stationery)

Anti-clockwise for wheel traction (moveable)

Adaptive design allows relocation of booth within the same space (castors and glide adjustments are built in)

Warranty: Other Information

Manufacturer's Warranty applies:
Structure: ten years limited warranty
Consumable Parts: three years

Certification:
Box meets ISO 9001 requirements
Sound testing ASTM E596-96 (reapproved 2016) by TUV
Sound testing ASTM E413-04 by TUV

Environmental:
Glue-free structure for improved air quality
Components selected considerate of the environment
Made by guideline of UL/CE/SAA
GECA Approved (good environmental choice Aust).

Noise Level of Fans:
Small fans are located at the bottom and the Box and
Larger fans located at the top of the Box.
Fans do not significantly increase the noise level in a
typical office environment

Power Outlets:
S (Talk) 1 x power; 1 x USB; 1 x Cat6
M (Focus) 3 x power; 1 x USB; 1 x Cat6
L / LX (Collab) 3 x power; 1 x USB; 1 x Cat6

All electrical components can be replaced separately.
Power cables: Three meters as standard.

Power Socket Location:
There are powder cord extended from the pod, so the
External power can either be from the back (LH or RHS)
Wall socket or floor box.
Power from ceiling available as special order.

Input Voltage:
Power 100-240 VAC; 50-60 Hz
Outlet: 100-240 VAC
LED Lights: 12 VA
Ventilation: 12 VAC
Box does not cause interference with wireless signals.

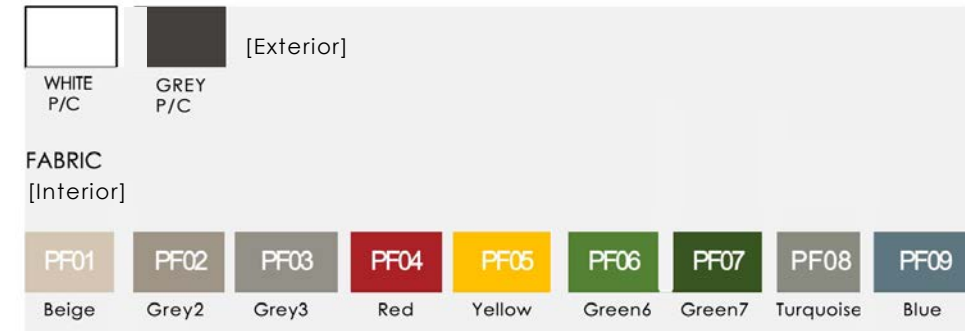

LED Light:
Strip light color temp. 4000K, index up to Ra90, efficiency up to 84lm/w
Lighting is comfortable (light is not dimmable)

Ventilation is automated and controlled by the circuit boards.

Installation: indicative
S = 3 hours (two installers)
M = 5 hours (four installers)
L / LX = 5 – 8 hours (four installers)

Finishes:

POWDER COATING

LEATHER [Interior]

BIOCOTE Solution

For the Box used in a public environment, the surface is made of steel and aluminum alloy

The use of AM BIOCOTE antibacterial powder provides the antibacterial effect up to 95%

BIOCOTE offers a globally recognized antibacterial technology solution that USES natural and safe antibacterial technology from silver ions to reduce the number of bacteria throughout the product life cycle, 24 hours a day, 7 days a week.

The technical solutions are mainly applied in hospitals, nursing homes, schools and other places with special requirements for health and hygiene.
